

Excerpt from the Regulations of Shibaura Institute of Technology

Chapter 2: Undergraduate

Section 2: Authorization of Completion of Studies and Class Subjects

(Terms of Classes for Each Subject)

Article 16

The Institute grants credits for a class subject specified by the Institute to a student who has completed a course for the class subject and passed regular examinations.

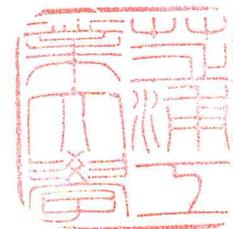

1 credit is awarded for the 45 hours of that required coursework as the standard way of calculation; it is awarded for other equivalent workload, depending on the format, the overall effectiveness and the necessary study hours outside lecture hours of a course. Thus, credits are calculated as follows:

- (1) For a lecture or a practice course, 1 credit is awarded for every 15-30 hours of class meeting time.
- (2) For a laboratory course, exercise course or a practical-skill course, 1 credit is awarded for every 30-45 hours of class meeting time.

Dr. Jun YAMADA, President

SHIBAURA INSTITUTE OF TECHNOLOGY
