7 universities from 5 countries and regions—Japan, South Korea, Thailand, Singapore, and Taiwan—take turns hosting an annual summer design workshop. Marking its 15th anniversary this year, the large-scale workshop was held at National Taiwan Ocean University, bringing together 130 students. Because this year marks the 400th anniversary of Keelung City, where the university is located, participants were also able to experience various cultural events. Under the theme “Proposing Experience Models to Enhance the Appeal of Keelung City,” the program challenged student groups to discover local issues and develop solutions through a two-day local immersion experience, all within a tight schedule. The next workshop is scheduled to be held at Chiang Mai University in Thailand next year.
