I. Introduction to Doctor's Program

1. Admission Policy

In the Doctor's Program, we aim to promote research and train researchers, and to foster specialist technicians and researchers who have a wealth of academic knowledge.

- Therefore we welcome the sort of students shown below.
- Those who share the principles and goals of the Graduate School of Engineering and Science.
- Those who have graduated from the Master's Program, or are at the forefront of society, and have high research capabilities.
- Those who can actively and creatively open up new fields.
- Those who can respect the ethics of engineering.

<Regional Environment Systems Course>

In limited areas such as urban cities, the social and cultural activities of human beings are likely to negatively affect the living environment in the area. For sustainable community development, harmony between the activation of community activities and conservation of the living environment is inevitable.

In addition, to realize this, there is a necessity to work on the issues spreading across a range of fields including electrical engineering and computer science, materials science, chemistry, mechanical engineering, architecture and civil engineering.

Doctoral candidates in the Regional Environment System Course will deepen research in their own specialized field. At the same time, it is also aimed that they will contribute to forming the foundation of a better society, culture and life in the regional environment to realize sustainable society by having an insight into the influence and effect of technology on society and nature, and through exchanging information among researchers from different specialized fields. The educational goal of this course is to nurture talents who have a broad view regarding the regional environment and can achieve this aim, by making use of their highly specialized knowledge.

<Functional Control Systems Course>

Japan in the 20th century placed an emphasis on efficiency and convenience, and strived towards manufacturing things, seeking to increase profitability. As a result, this approach put Japan in a situation where it faced contradictions such as the destruction of environment. Currently, Japan possesses technologies, which lead the world in such fields as automobiles, robotics, electronics and telecommunications, whilst resolving such contradictions. These technologies are becoming increasingly more complex. In order to contribute to the world as a leader of science and technology in the global society going forward, Japan will be required to exercise high-level design capabilities and technology management skills, which will enable Japan to grasp the overall picture of increasingly complex technologies and promote harmony within the overall system, in addition to the ability to deeply analyze and comprehend objects.

For example, at the nuclear accident, which occurred immediately after the Great East Japan Earthquake, the importance of systemized technology regarding the use of technology in a society including its implementation and operation was reaffirmed. Moreover, the 17 Sustainable Development Goals (SDGs) were adopted by the all UN members in 2015. This suggests that it is time for us to reconsider practical education. At the same time, this also means that nurturing researchers and engineers who will acquire the global values and capabilities required to work internationally for the realization of sustainable society.

Based on such a background, the Functional Control Systems Course aims to provide education and to conduct research to nurture outstanding researchers and engineers who have global values and the ability to fully grasp the truth of science and make use of it in practical education. This course consists of a number of different education and research fields, such as communication function control, functional device control, system control, and biosystems and biomolecule control, and operates interdisciplinary education and research. Taking this approach ensures that the course is not specialized in education and research being exclusively relevant to the areas of its academic staff's expertise. The course also aims to nurture researchers and engineers with basic skills for technology management and proficiency in English for engineers as well as shared values and ethics, while the course as a whole is aware of the relevance based on the diversity in the course and actively promotes collaboration with each other.

2. Degree for the Doctor's Program

Students who completed doctor's Program will be awarded a Doctor of Philosophy degree.

II. Application Guideline for Doctor's Program

~2023 Fall Enrollment~

1. Course and Number of students accepted

Program	Course	Intake per year
Doctor's Program	Regional Environment Systems	12
	Functional Control Systems	15

*The number of students to be accepted is not for each exam unit but for the entire year of 2023.

2. Type of Examination

You can apply for the either of following exam types.

(1) General Program

You can apply for this course if you meet one of the requirements of "3. Qualification for Applicants".

(2) Program for Working Adults

You can apply for this course if you meet all of the following requirements.

- You meet one of the requirements of "3. Qualification for Applicants".
- You are working in the public office, company or organization and your superior or boss has authorized your application for this doctor's program.

* As a general rule, applicant is supposed to enroll in the doctor's program while continuing to work full-time.

3. Qualification for Applicants

Applicants must meet either or the application requirements (1) to (7) listed below.

- (1) Those who have completed or expect to receive a master's degree or professional degree by the end of September 2023.
- (2) Those who have received or expect to receive a degree by the end of September 2023 from a university abroad that is equivalent to a master's degree or professional degree.
- (3) Those who have received or expect to receive a degree by the end of September 2023 from a university abroad that is equivalent to a master's degree or professional degree by taking courses of such university in Japan by correspondence.
- (4) Those who have received or expect to receive a degree by the end of September 2023 from

a university abroad that is equivalent to a master's degree or professional degree by taking the courses, specified separately by the Minister of Education, Culture, Sports, Science and Technology, of educational facilities positioned as those with a graduate program abroad.

(5) Those who have received or expect to receive a Master's degree through course completion at the United Nations by the end of September 2023.

(6) For those specified by the Minister of Education, Culture, Sports, Science and Technology (the announcement no. 118 of the Ministry for 1989) (Note1).

(7) For those who will become 24 years old by the end of September 2023 and who are certified to have an academic skill equivalent to that of a student with a master's degree or professional degree by the review of the Committee of the Graduate School of Engineering and Science (Note2).

Note1) Those who are applicable to the qualification for applicants, (6)(7) mean "those who graduated from university and engaged in research for two years or more at a university or research institute and are certified to have an academic skill equivalent to that of a student with a master's degree for their research achievement by the Graduate School of Engineering and Science" or "those who, after completing the 16-year course of study of school education abroad or taking courses provided by foreign school in Japan by correspondence, engaged in research for two years or more at a university or research institute and are certified to have an academic skill equivalent to that of a student with a master's degree for their research achievement by the Graduate School of Engineering and Science".

Note2) Those who are applicable to the qualification for applicants, (7), "those who are certified to have an academic skill equivalent to that of a student with a master's degree or professional degree" must satisfy either of the following requirements.

- ① University graduates who have more than three years of practical experience in the relevant field and engaged in research and development activities for two years or more.
- ② For those other than above, **those who have an academic skill equivalent to that of a student with a master's degree or professional degree for their achievement including publication of books, scientific papers, academic lecture, scientific reports and patents, etc.**

※ **If you apply in terms of qualification (7) you are subject to Prequalification.**

Please contact the Graduate School Section via e-mail well before May 6, 2023:

daigakuin@ow.shibaura-it.ac.jp

※ **Please make sure to receive preliminary guidance from a prospective supervisor before submitting your application.**

4. Application Procedures

- (1) Contact the preferred supervisor you would like to pursue the degree and discuss on the examination requirements and research project. Also, obtain the supervisor's consent in accepting you to be part of the supervisor's research laboratory after admission.
- (2) Download the application guidelines and read them carefully.
- (3) Prepare the necessary documents and convert them into data as instructed in the application guidelines.
- (4) Enter the required information and upload the required documents on TAO by the application deadline.
- (5) Send a request for recommender to make a letter of recommendation by the deadline.
- (6) During the online application system acceptance period, request the supervisor who agreed to accept you to issue an acceptance letter.
- (7) Pay the examination fee by the deadline and complete submission after checking your application thoroughly on any defects or incomplete information.

※In the case the application deadline is over before completing the procedures, the application will not be accepted. (The online system will be automatically closed after the deadline.)

※Please be sure to complete all procedures (especially 5, 6, 7) by specified application deadline

< Note >

Before proceeding with the application, the applicant must first contact supervisor whom he/she wish to pursue their research study. You should discuss about the research plan, interview session and obtain the acceptance to enter the research laboratory. If you have no means to contact him/her, e-mail documents specified below to the section-in-charge.

(Make an introduction statement e-mail so the section-in-charge may directly forward the e-mail to the preferred supervisor)

1. [Admission Consultation Sheet](#) (Please download the Excel file.)
2. Reasons why you wish to be supervised by the faculty member (Please provide specifics.)
3. CV (Education background, work experience etc. / Any format is acceptable. / Please provide details so that there are no blank periods.)
4. Summary of previous research and Research Achievement (Any format is acceptable.)
5. Research Plan (Any format is acceptable.)
6. Certificate (or Prospect) of Graduation (Original language ver. and Japanese or English ver.)
7. Transcript Certificate(Original language ver. and Japanese or English ver.)
8. English test score (TOEIC L&R, TOEIC S&W, TOEFL iBT, GTEC (for Business) or IELTS Academic)

※If the original is written in a language other than Japanese or English, submit both the original and the one written in Japanese or English.

As it will take time in contacting and getting the feedback from the supervisor, our new referral date for the deadline is **May 15th (Mon.) 2023 12:00 (JST)**. Please take note that the submission after the date is not accepted.

※Application is not accepted if there is no acceptance from the supervisor.

※Please note that depending on the availability of the supervisor, it may not be possible to set up an interview and obtain acceptance permission even if you contact the supervisor before this date.

IV. On the Acquisition of Status of Residence as “Studying Abroad”

Foreign students who are permitted to enter Shibaura Institute of Technology can apply for the status of residence as "Student". Please take note that you cannot be enrolled at a university for the purpose of staying of a "short stay".

Please read the following information carefully, and if you fall under any of these conditions, please go through the necessary procedures such as renewal period of stay, change of status of residence, application for certificate status of residence and etc.

Current Condition	Required Procedures
1) Having the status of residence as “Student”	If necessary, please apply for permission to renew your period of stay. This procedure can be carried out 3 months before the expiration date of the status of residence period.
2) Having the status of residence as “Short Term Stay”	As a general rule, you have to fly out from Japan once and apply for the status of residence of "Student" from other country or your country of residence. For more details, please refer to “4. I do not have status of residence”.
3) Have a status of residence other than "Student" or "Short-term stay" ※ "Settlement person" "family stay" “dependence” or etc.	There is no particular process is needed, means you can enter with the current status. But if you wish to change your status of residence to "Student", please apply for "Change of Status of Residence".
4) Not having status of residence (New acquisition of status of residence)	To apply for a status of residence, you must first apply for a Certificate of Eligibility (CoE) from the Immigration Bureau in Japan. Shibaura Institute of Technology applies for the COE on behalf of the student in Japan. Once the CoE is issued from the Immigration Bureau to Shibaura Institute of Technology, it will be-mailed to the applicant. After you received the CoE, apply for a “Student” visa (status of residence) at a Japanese embassy or consulate in the country or country of residence within the valid period of the CoE.

For "Application for Renewal/ Extension Period of Residence", "Application for Change of Status of Residence" and "New Acquisition of Status of Residence", application documents with a seal from Shibaura Institute of Technology are required. These documents can be issued to those **who passed the entrance examination and paid the admission fee.**

It takes several days to issue the required documents. Therefore, please contact in advance according to the following guidance.

■ About necessary documents for the application of status of residence's issuance procedure

- ① After passing the entrance exam, please follow the instructions to pay the admission fee
- ② Please send an e-mail to the Graduate School Section <daigakuin@ow.shibaura-it.ac.jp> with the following contents.
 - Examination number, name
 - Necessary procedure name (Period of extension of period of residence, application for change of status of residence or new acquisition of status of residence)
 - Attachment of scanned data of residence card (only in case of application for permission to renew period of residence / application for change of status of residence)
- ③ After confirming the status of payment transfer of the applicant's admission fee, Shibaura Institute of Technology Graduate School Section will issue the required documents. We will inform by e-mail on the issuance date of the documents, therefore please come to Graduate School Section to collect the document for your next procedure of application (for the issuance of CoE by the Immigration Bureau, we will deliver the CoE by EMS airmail to your home address).

The issuance of status of residence procedure takes weeks to complete. Make sure each student is responsible for managing his / her period of stay and taking necessary procedures accordingly.
