The theme of this International Workshop, took place in Aalto University, was to find and document the appropriate place for learning experiences today. The students in groups of three or four, made close observations on Aalto University campus, which was originally designed by the renowned architect, Alvar Aalto, and recently expanded the campus. The series of lectures by the professors of Aalto University and Landscape architects informed the students in depth of the background of campus design. For the final presentation, each student prepared drawings that documented their findings and proposal for improvements.
