The global Project-based learning (PBL) program in the department of Materials Science and Engineering has been conducted at Chulalongkorn University (CU) in Thailand from July 30th to August 12th, 2019. The student from SIT and CU were joined in the program. The aim of the program is to work with foreign students to solve problems, and to improve practical skills and global communication skills. Therefore, our program emphasized the collaboration with foreign students majoring in material engineering, and also the discussion with a small group, increasing learning effect. The contents of program included the PBL, academic English trainings, special lectures, factory tours, and internship at company.
