This gPBL is hold every year in early February, Shibaura Institute of Technology, Tokyo City University, Chiba Institute of Technology and Kookmin University from korea. For this year, We conducted Design Workshop about AI (artificial intelligence) + multiple keywords for 8 days (entertainment, education, fashion, movement, watching games, etc.) and drawing a vision of the future.
In total, 80 over students from both countries were made into 13 groups and worked for more than a week to make good ideas. There were so many interesting and feasible designs. The 1st to 3rd award groups will enter the international competition with the Korean Design Society.
