In collaboration with the Nippon-India Center of Regenerative Medicine (NCRM), NCRM NICHE was held to interact with excellent young researchers and students all over the world. Keynote lectures by world authorities in regenerative medicine (free of charge, with simultaneous interpretation) Fujiu Cup Quiz competing for knowledge of advanced technology of regenerative medicine, and Interdisciplinary Conclave introducing research by Japanese graduate students were held at Toyosu Campus Mai-Lecture Room.

Due to Typhoon No. 19 which attacked Tokyo on the 13th, the flight arrivals of the participants were greatly delayed, and some participants arrived at midnight. Nevertheless, all participants were safely transferred to Tokyo by the first day owing to the swift response of the students of the Department of Applied Chemistry. (Through this, the participants seemed to have increased their trust in the university students.)

In consideration of the physical condition of the participants, the program had to be shortened, and the scheduled tours of Shibaura Institute of Technology and the University of Tokyo laboratory were canceled. After a fierce battle, Fujiu Cup Quiz was won by Ms. Reshma Romanas and Ms. Aayurshi Agrahari from Kasturba Medical College (India). Interdisciplinary Conclave has one presentation from the University of Tokyo, one from Chiba University, and two presentations from the University. The former two were selected as the best presentations.

On the last day, after visiting the Yoshimi Laboratory and Techno Plaza, we took a commemorative photo at the Yukata Workshop and ended.
