

Prof. Ikuro Shimizu

Laboratory name

Housing & Environmental Design Studio / Laboratory

Keyword

Field Architecture, Vernacular Architecture Worldwide, Fieldwork

Activities in the laboratory

Our aim is to understanding the interaction between architecture and human being, particularly with a focus on vernacular ways of housing and creating living environment. We carry out fieldwork in Japan and abroad, sharing time and space with people who actually live. In the fieldwork, common sense, which we thought ordinary, will be deeply shaken. The reality that people live will demonstrate the deep reality of life as the essence of architecture for you.

Eligibility-school year

- Third year undergraduate
- Fourth year or higher undergraduate
- First year master
- Second year or higher master
- First year doctoral degree
- Second year doctoral degree
- Third year or higher doctoral degree

Eligibility-student's major/fields

- Mechanical
- Chemistry
- Material
- Electrical
- Electronic
- Computer Science
- Lifescience
- Mathematical
- Civil Engineering
- Architecture
- Engineering and design

Required skills

Drawing skill of the plan, section, cross section etc...of the house.  
CAD softwear operating skill.

Desired skills (Preferred skills)

Sketch with hand.
